I'm aiming for a fully remote position due to my physical limitations. I may not have a lot of on the job experience but I've been a developer for quite a while and just waiting for the right opportunity. I can create anything that I put my mind to and can understand code pretty quickly so I don't have to be coached on everything.

Personal Details

Citizenship: Filipino

Work Experience

Web Developer

Blue Inspires - Work from Home

October 2020 to March 2021

I worked there as a remote web developer. I mostly did WordPress and static websites for their clients and sometimes I even do the deploying myself. I went there thinking that I'm gonna learn a lot but it turned out to be me who brought a lot of value to them.
